PAYROLL/BENEFITS

Section Subject: Pay Grade and Compensation Plan - Page 4

Adopted: October 4, 2022

04-10-11 Cost of Living Adjustments. To assure that the purchasing power of each employee's compensation retains a reasonable relationship to changes in the cost of living, the governing body may, during the budgeting process, adjust the rate of compensation by reference to the Consumer Price Index (CPI), as reported by the Bureau of Labor Statistics of the U.S. Department of Labor for the previous calendar year.

Recognizing that a cost of living adjustment is an adjustment in the purchasing value of a dollar and not in the relative value of labor, any cost of living adjustment shall be applied uniformly as either a percentage increase or flat rate increase applied to all pay grades and compensation steps. The amount of any cost of living adjustment and whether a percentage or flat rate increase will be utilized shall depend ultimately upon the City's financial circumstances, as determined by the governing body.

RE:

Inflation Factor for Mill Levy Calculation in 15-10-420, MCA for FY 2026

The inflation factor for FY 2026 is 2.11%.

Per <u>15-10-420</u>, <u>MCA</u>, "a governmental entity that is authorized to impose mills may impose a mill levy sufficient to generate the amount of property taxes actually assessed in the prior year plus one-half of the average rate of inflation for the prior 3 years."

Additionally, the Department of Revenue shall, "calculate one-half of the average rate of inflation for the prior 3 years by using the consumer price index (CPI), U.S. city average, all urban consumers, using the 1982-84 base of 100, as published by the bureau of labor statistics of the United States Department of Labor."

One-half the average rate of (compounding) inflation was determined by taking the cubed root of the CPI for December 2024 (315.493) divided by the CPI for December 2021 (277.948), subtracting one, and multiplying the result by 50%.

$${\binom{Inflation}{Factor}} = {\left(\sqrt[3]{\frac{CPI_{2024}}{CPI_{2021}}} - 1\right)} (50\%) = {\left(\sqrt[3]{\frac{315.493}{277.948}} - 1\right)} (50\%) = 2.11\%$$

If you have any questions, please feel free to contact me by way of email at dylan.cole@mt.gov or by phone at 406-444-6634.
