

Pacific Street Reconstruction

The city of East Helena started the Pacific Street reconstruction in April of 2022. Pacific Street was constructed with poor base material causing severe asphalt failure. Both the water and sewer mains on Pacific Street between Helena Avenue and Thurman Avenue reached the end of their design life and were replaced. New sidewalks were constructed on both sides of the street. Construction was completed in August of 2022. This project was funded with ARPA and local funds.
