

Wylie Well #4

Wylie Well #4

Well Improvements Project

The city of East Helena received full funding through the Montana Environmental Trust Group (METG) to make improvements to the City's McClellan water source and develop a new well along Wylie Drive (Wylie Well #4). Improvements include new well buildings and pumps and a pedestrian bridge over Prickly Pear Creek. These improvements will ensure clean drinking water and improve the functionality of the water system for City of East Helena residents. Construction will be completed in the summer of 2023.
