

# WHAT ARE THE ENVIRONMENTAL IMPACTS OF THE PROJECT?

## Positive Impacts

### Improved Effluent Quality

- + Healthier for Prickly Pear Creek and Lake Helena
- + Expands future reuse opportunities

### Benefits to Groundwater

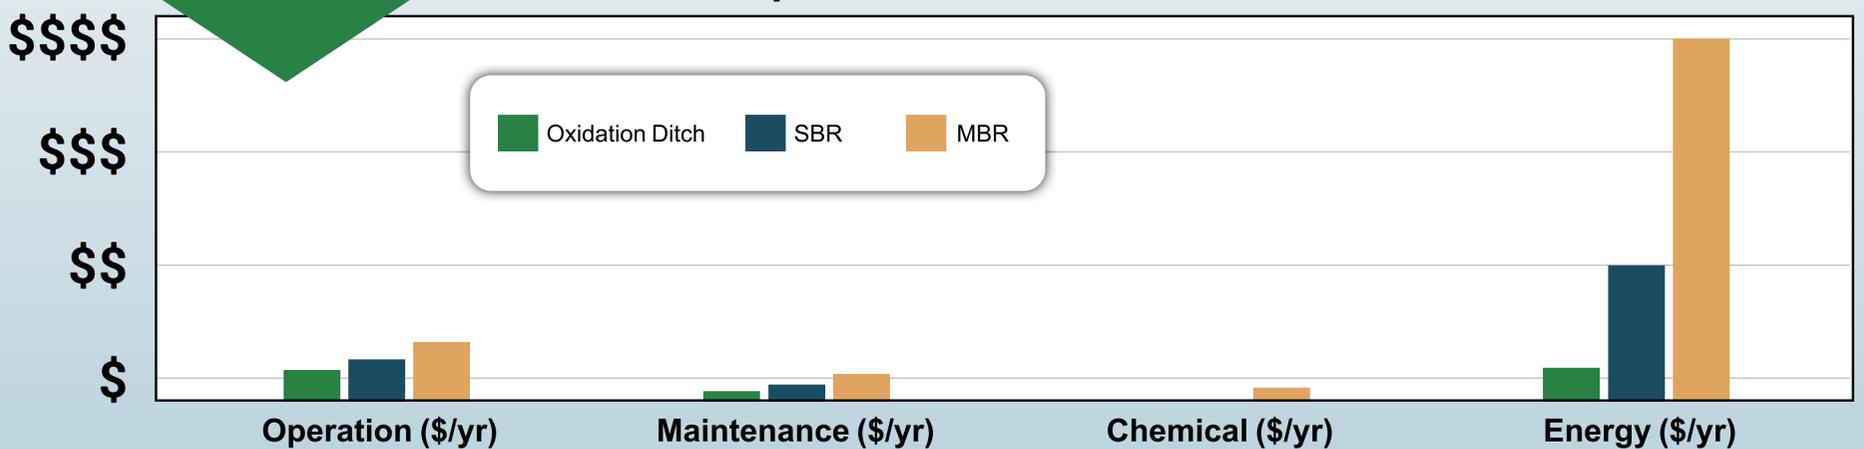

- + Eliminates potential leaks from lined, earthen basins

### Lower energy & chemical costs

- + Updated premium efficiency motors
- + Reduced alum consumption

Annual Operation and Maintenance Costs

## Negative Impacts

- Dust from disturbed areas
- Noise from heavy equipment
- Increased traffic on local streets

**All temporary during construction**
